Google Cloud

Published IPv4 footprint / estimated country totals

10^3 10^4 10^5 10^6 10^7

IPv4 addresses per country / shared logarithmic scale

METHOD / SOURCE NOTES

Sources: official provider lists; IP2Location LITE DB11; Natural Earth. Hatch color shows national counts; density is constant.
Unmarked dark: zero in this list; medium grey: no geolocation denominator. List scopes differ; Google Cloud overlaps Google.
